

Merchandise Inventory

Chapter 6

Learning Objective 1

Define accounting principles related to inventory

Accounting Principles & Inventories

Consistency

Disclosure

Materiality

Conservatism

Copyright (c) 2009 Prentice Hall. All rights reserved.

3

Accounting Principles

- ▶ Consistency
- ▶ Disclosure
- ▶ Materiality
- ▶ Conservatism

Copyright (c) 2009 Prentice Hall. All rights reserved.

4

Learning Objective 2

Define inventory costing methods

Inventory Costing Methods

Specific-unit
cost

First-in,
First-out

Last-in,
Last out

Average-
cost

Copyright (c) 2009 Prentice Hall. All rights reserved.

6

Specific Unit Cost

- ▶ Each inventory item is identified by its specific cost

First-In, First-Out (FIFO)

Assumes oldest items are sold first

Therefore, newest items are on hand

Last-In, First-Out (LIFO)

Assumes newest items are sold first

Therefore, oldest items are on hand

Average Cost

$$\text{Cost of Inventory on Hand} \div \text{Number of Units on Hand} = \text{Average Cost}$$

Learning Objective 3

Account for perpetual inventory by the three most common costing methods

First-In, First-Out (FIFO)

Beginning Inventory

Purchase 5 shirts

Inventory = \$48

Then we sell 4 shirts for \$20 each.
What costs should be assigned to
Cost of goods sold?

First-In, First-Out

Cost of good sold = \$42

First-In, First-Out (FIFO)

GENERAL JOURNAL				
DATE	DESCRIPTION	REF	DEBIT	CREDIT
	Accounts receivable (\$20 x 4)			
	Sales revenue			
	<i>To record sales on account</i>			
	Cost of goods sold			
	Inventory			
	<i>To record cost of sales</i>			

Copyright (c) 2009 Prentice Hall. All rights reserved.

13

First-In, First-Out (FIFO)

Sales	\$?
Cost of goods sold	?
Gross profit	\$?

Copyright (c) 2009 Prentice Hall. All rights reserved.

14

Last-In, First-Out (LIFO)

Beginning Inventory

Purchase 5 shirts

Inventory = \$42

Then we sell 4 shirts for \$20 each.
What costs should be assigned to
Cost of goods sold?

Last-In, First-Out

Cost of good sold = \$48

Copyright (c) 2009 Prentice Hall. All rights reserved.

15

Last-In, First-Out (LIFO)

GENERAL JOURNAL				
DATE	DESCRIPTION	REF	DEBIT	CREDIT
	Accounts receivable (\$20 x 4)			
	Sales revenue			
	<i>To record sales on account</i>			
	Cost of goods sold			
	Inventory			
	<i>To record cost of sales</i>			

Copyright (c) 2009 Prentice Hall. All rights reserved.

16

Last-In, First-Out (LIFO)

Sales	\$?
Cost of goods sold	?
Gross profit	\$?

Copyright (c) 2009 Prentice Hall. All rights reserved.

17

Average Cost

Beginning Inventory

Purchase 5 shirts

Inventory = \$11.25 x 4 = \$45

Then we sell 4 shirts for \$20 each.
What costs should be assigned to
Cost of goods sold?

Compute the Average Cost		
	Units	Cost
Beginning inventory	3	\$30
Purchases	5	60
Total	8	\$90

Average = \$90/8 = \$11.25

Cost of good sold = \$11.25 x 4 = \$45

Copyright (c) 2009 Prentice Hall. All rights reserved.

18

Average Cost

GENERAL JOURNAL				
DATE	DESCRIPTION	REF	DEBIT	CREDIT
	Accounts receivable (\$20 x 4)			
	Sales revenue			
	<i>To record sales on account</i>			
	Cost of goods sold			
	Inventory			
	<i>To record cost of sales</i>			

Average Cost

Sales	\$?
Cost of goods sold	?
Gross profit	\$?

Learning Objective 4

Compare the effects of the three most common costing methods

Use of Inventory Methods in Practice

Comparison

	FIFO	LIFO	Average
Sales	\$80	\$80	\$80
Cost of goods sold	\$42	\$48	\$45
Gross profit	\$38	\$32	\$35

Advantage of Each Method

**First-In,
First-Out**

**Last-In,
First-Out**

**Average
Cost**

Learning Objective 5

Apply the lower-of-cost-or market rule to inventory

Lower-or-Cost-or-Market Rule

- ▶ Example of Accounting Conservatism
- ▶ Inventory is reported at lower of:
 - Historical cost or
 - Market value (current replacement cost)

Problem 6-28A

#1

GENERAL JOURNAL				
Date	Accounts	Post Ref	Debit	Credit
	Cost of goods sold		\$25,000	
	Inventory			\$25,000

#2

L and M Electronics Balance Sheet December 30, 2012	
Current assets:	
Inventory, (at lower-of-cost-or-market)	\$80,000

Problem 6-28A (continued)

#3

L and M Electronics Income Statement Year ended December 31, 2012	
Cost of goods sold	\$430,000

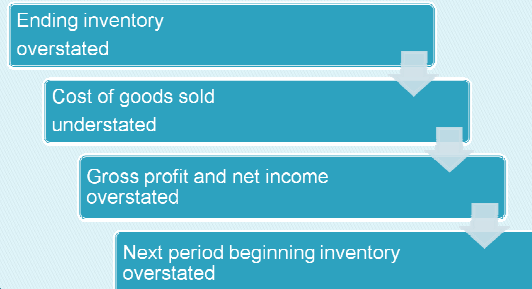

#4

Learning Objective 6

Measure the effects of inventory errors

Inventory Errors- Ending inventory overstated

Inventory Errors- Ending inventory understated

Learning Objective 7

Estimate ending inventory by the gross profit method

Gross Profit Method

Beginning inventory		\$15,000
Net purchases		<u>70,000</u>
Cost of goods available		85,000
Estimated cost of goods sold:		
Sales revenue	\$100,000	
Less: Estimated gross profit of 35%	(35,000)	
Estimated cost of goods sold		<u>(65,000)</u>
Estimated cost of ending inventory		\$20,000

Exercise 6-27

Beginning inventory		\$47,000
Net purchases		<u>30,300</u>
Cost of goods available		77,300
Estimated cost of goods sold:		
Sales revenue	\$63,000	
Less: Estimated gross profit of 35%	(22,050)	
Estimated cost of goods sold		<u>(40,950)</u>
Estimated cost of ending inventory		\$36,350

End of Chapter 6
